TRACKSTAR STOLEN VEHICLE TRACKING APP

New Stolen Vehicle Tracking App for Android and IOS:

The Trackstar App provides Trackstar customers with powerful functions to complement the Trackstar tracking system, such as:

Vehicle Location – will show you the last known location of the vehicle, normally where the vehicle was parked,

Geofencing – enables a Trackstar customer to define a location and receive an email alert if the vehicle is moved outside of the geofence.

Journey History - provides a view of recent journeys.

Journey Replay – allows the customer to replay a recent journey, showing the position of the vehicle and its speed for the duration of the journey.

The app is now available and is downloadable from iTunes and Google Playstore.

OPERATION

App Registration

Once you have downloaded your App you will need to generate a device registration key to activate it.

Go to the Eurowatch platform:

<https://secure.eurowatchcentral.com>

and login with the username and password issued to you when the tracking unit was first installed.

From the Subscriber home page menu select the "Manage Mobile App" hyperlink. Then generate the activation key. Enter the number of your mobile phone where you have installed the Trackstar App. Click 'Generate Key' to generate new key. The screen will update to show the new activation key, and a text message will also be sent to your mobile phone.
